PROFILE

I am a third-year college student, incoming fourth-year college this school year at University of Santo Tomas. I am studying Bachelor of Science in Information Systems and I had experience in frontend and backend web development, design and data analytics during college. I have strong interest in Web technologies and I am willing to study different tech stacks.

SKILLS

- HTML & CSS
- Javascript
- Python
- MySQL
- NodeJs & ExpressJs
- Pandas, Matplotlib, Numpy
- Microsoft Excel & Spreadsheet

PROJECT EXPERIENCE

WEB DEVELOPMENT

- Created a Web UI design and implemented it into fully functioning website with real client as part of our requirements in college.
- Built a school blackboard web application using NodeJs, ExpressJS, and MySQL as a personal project.
- Implemented the Frontend design of our Software Engineering project into an actual working web application.

MACHINE LEARNING & DATA ANALYTICS

- Developed a machine learning model and utilized different natural language processing technique to analyze the sentiment of a client's customer during our Capstone Project.
- Performed fraud detection using different classification algorithms.
- Performed multiple linear regression algorithm to predict Car prices and identified the significant variables using backward elimination.
